

Proporção média de rótulos por cluster — emotions | bubble

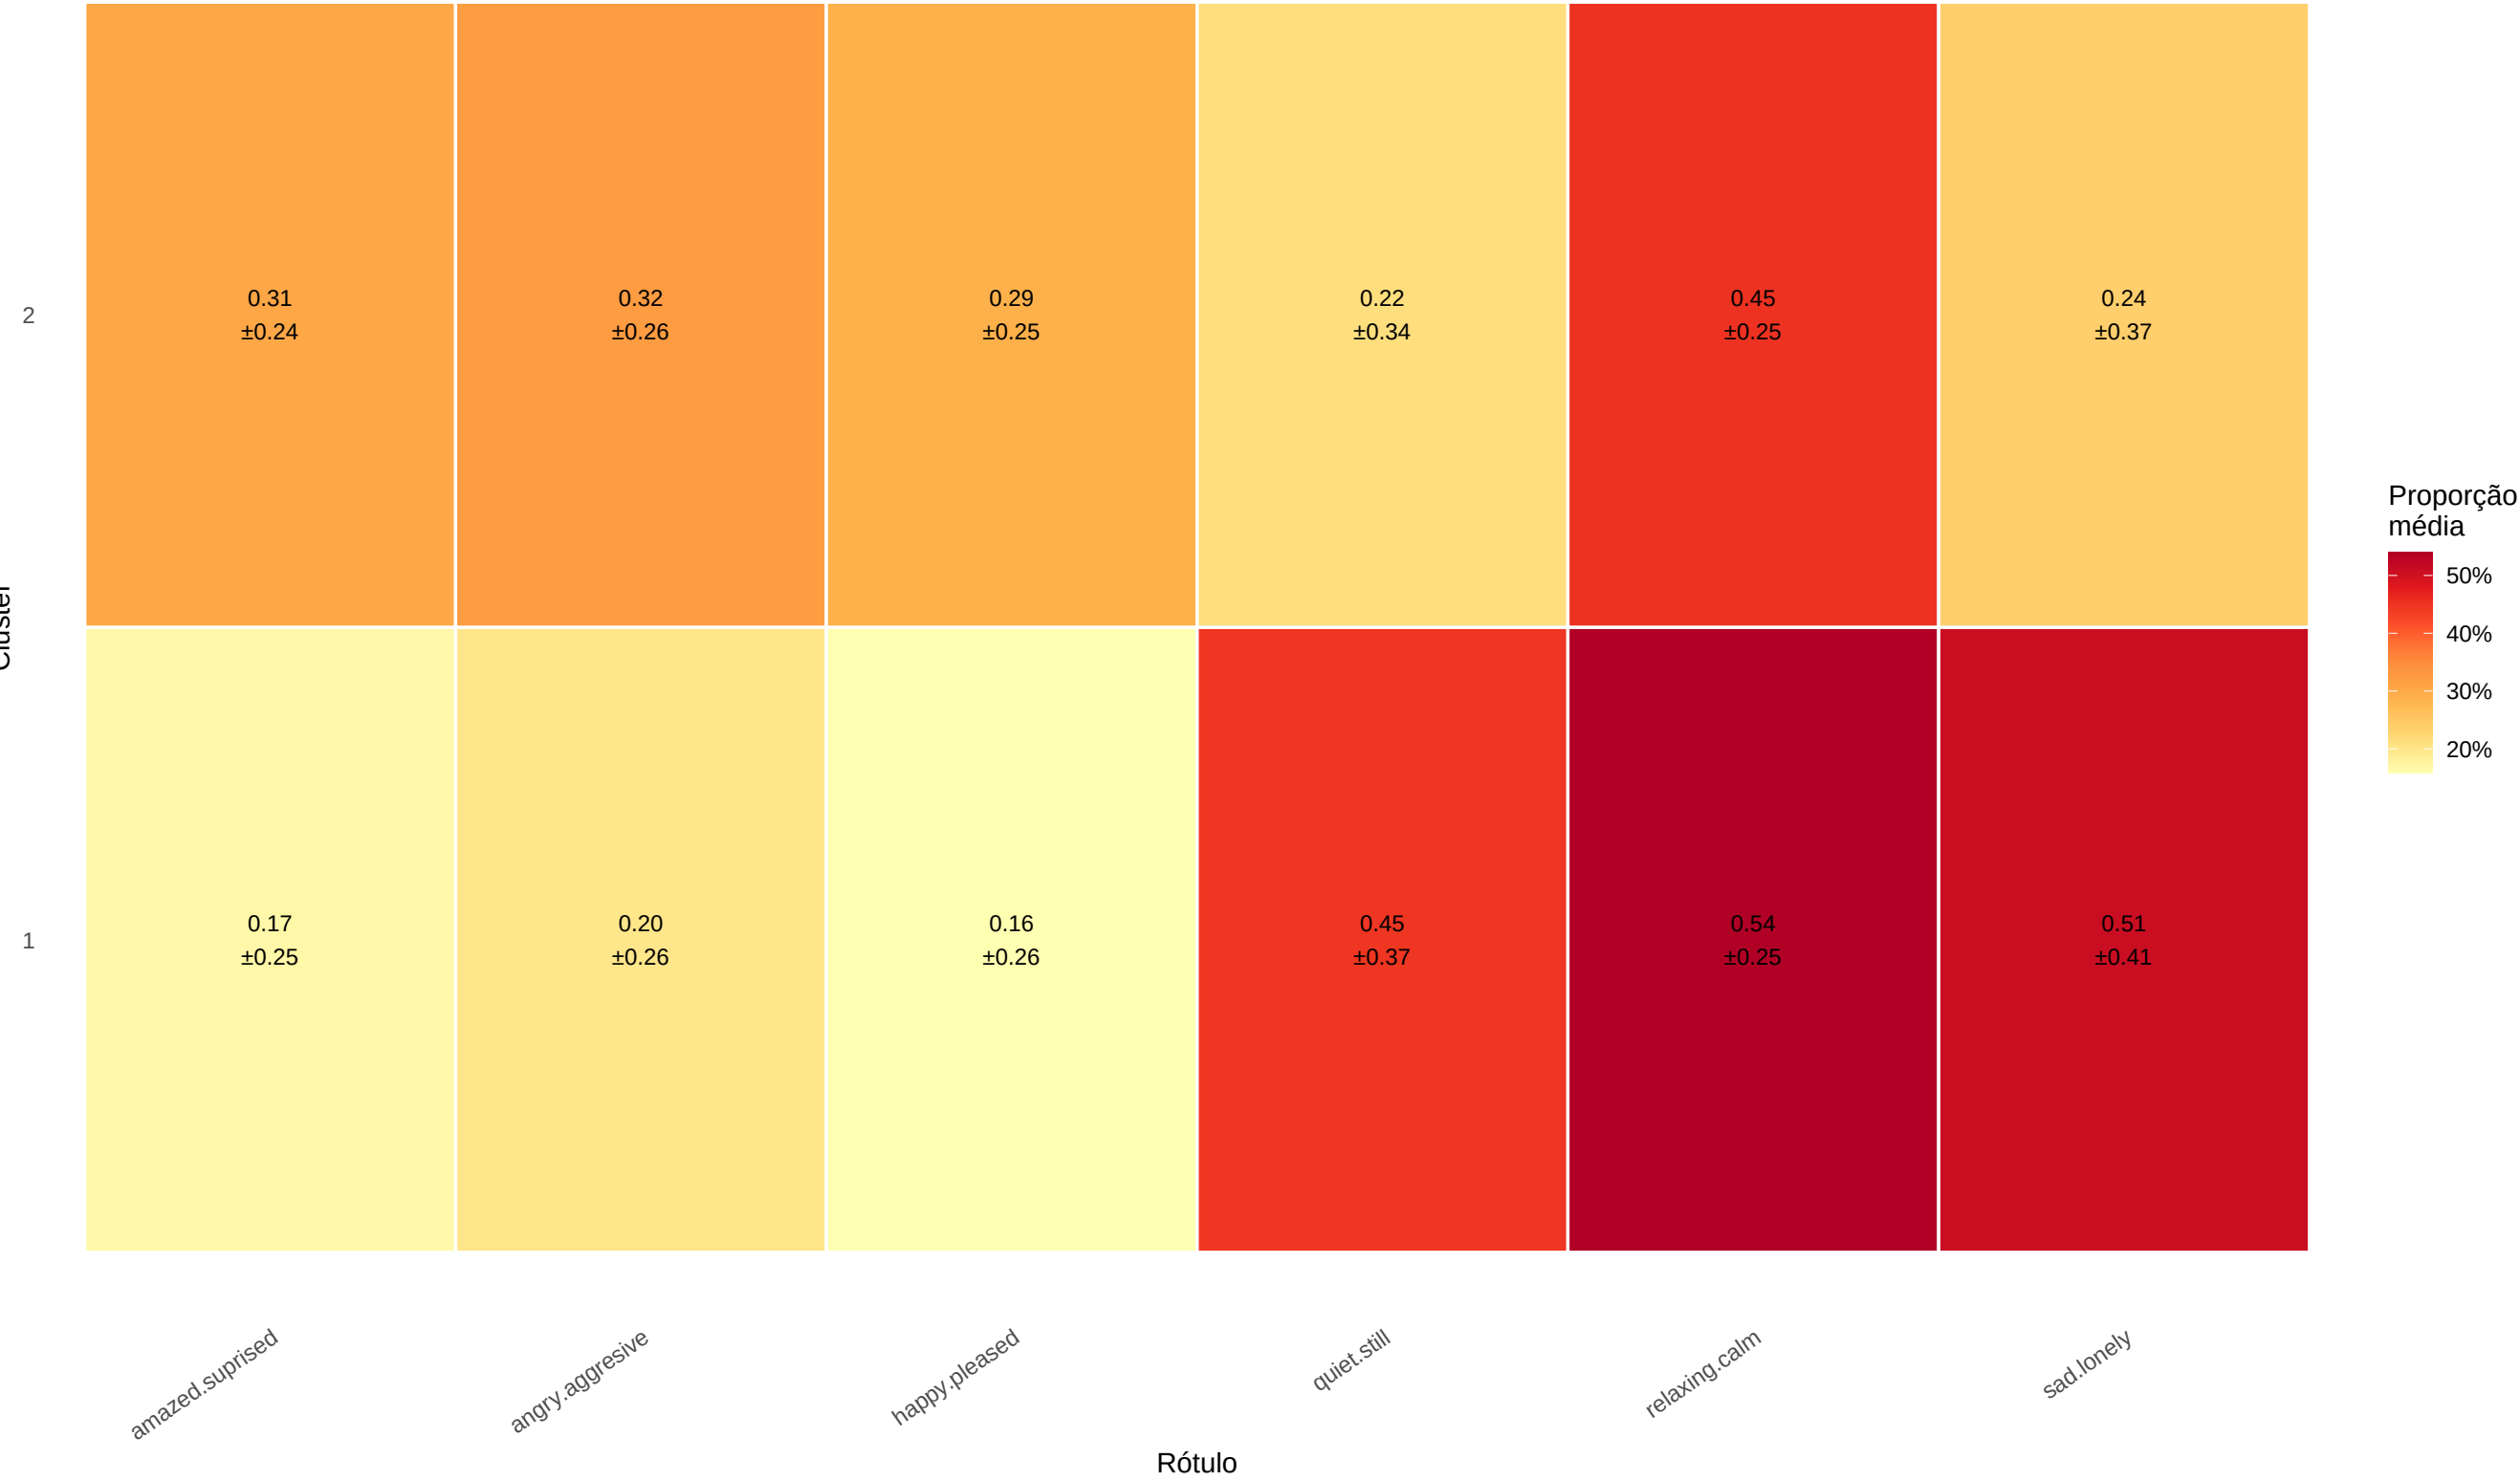

Barras de erro = ± 1 DP entre folds · quanto mais sobrepostas, mais instável a partição

Cluster 1 2

Heatmap de rótulos por cluster — emotions | bubble

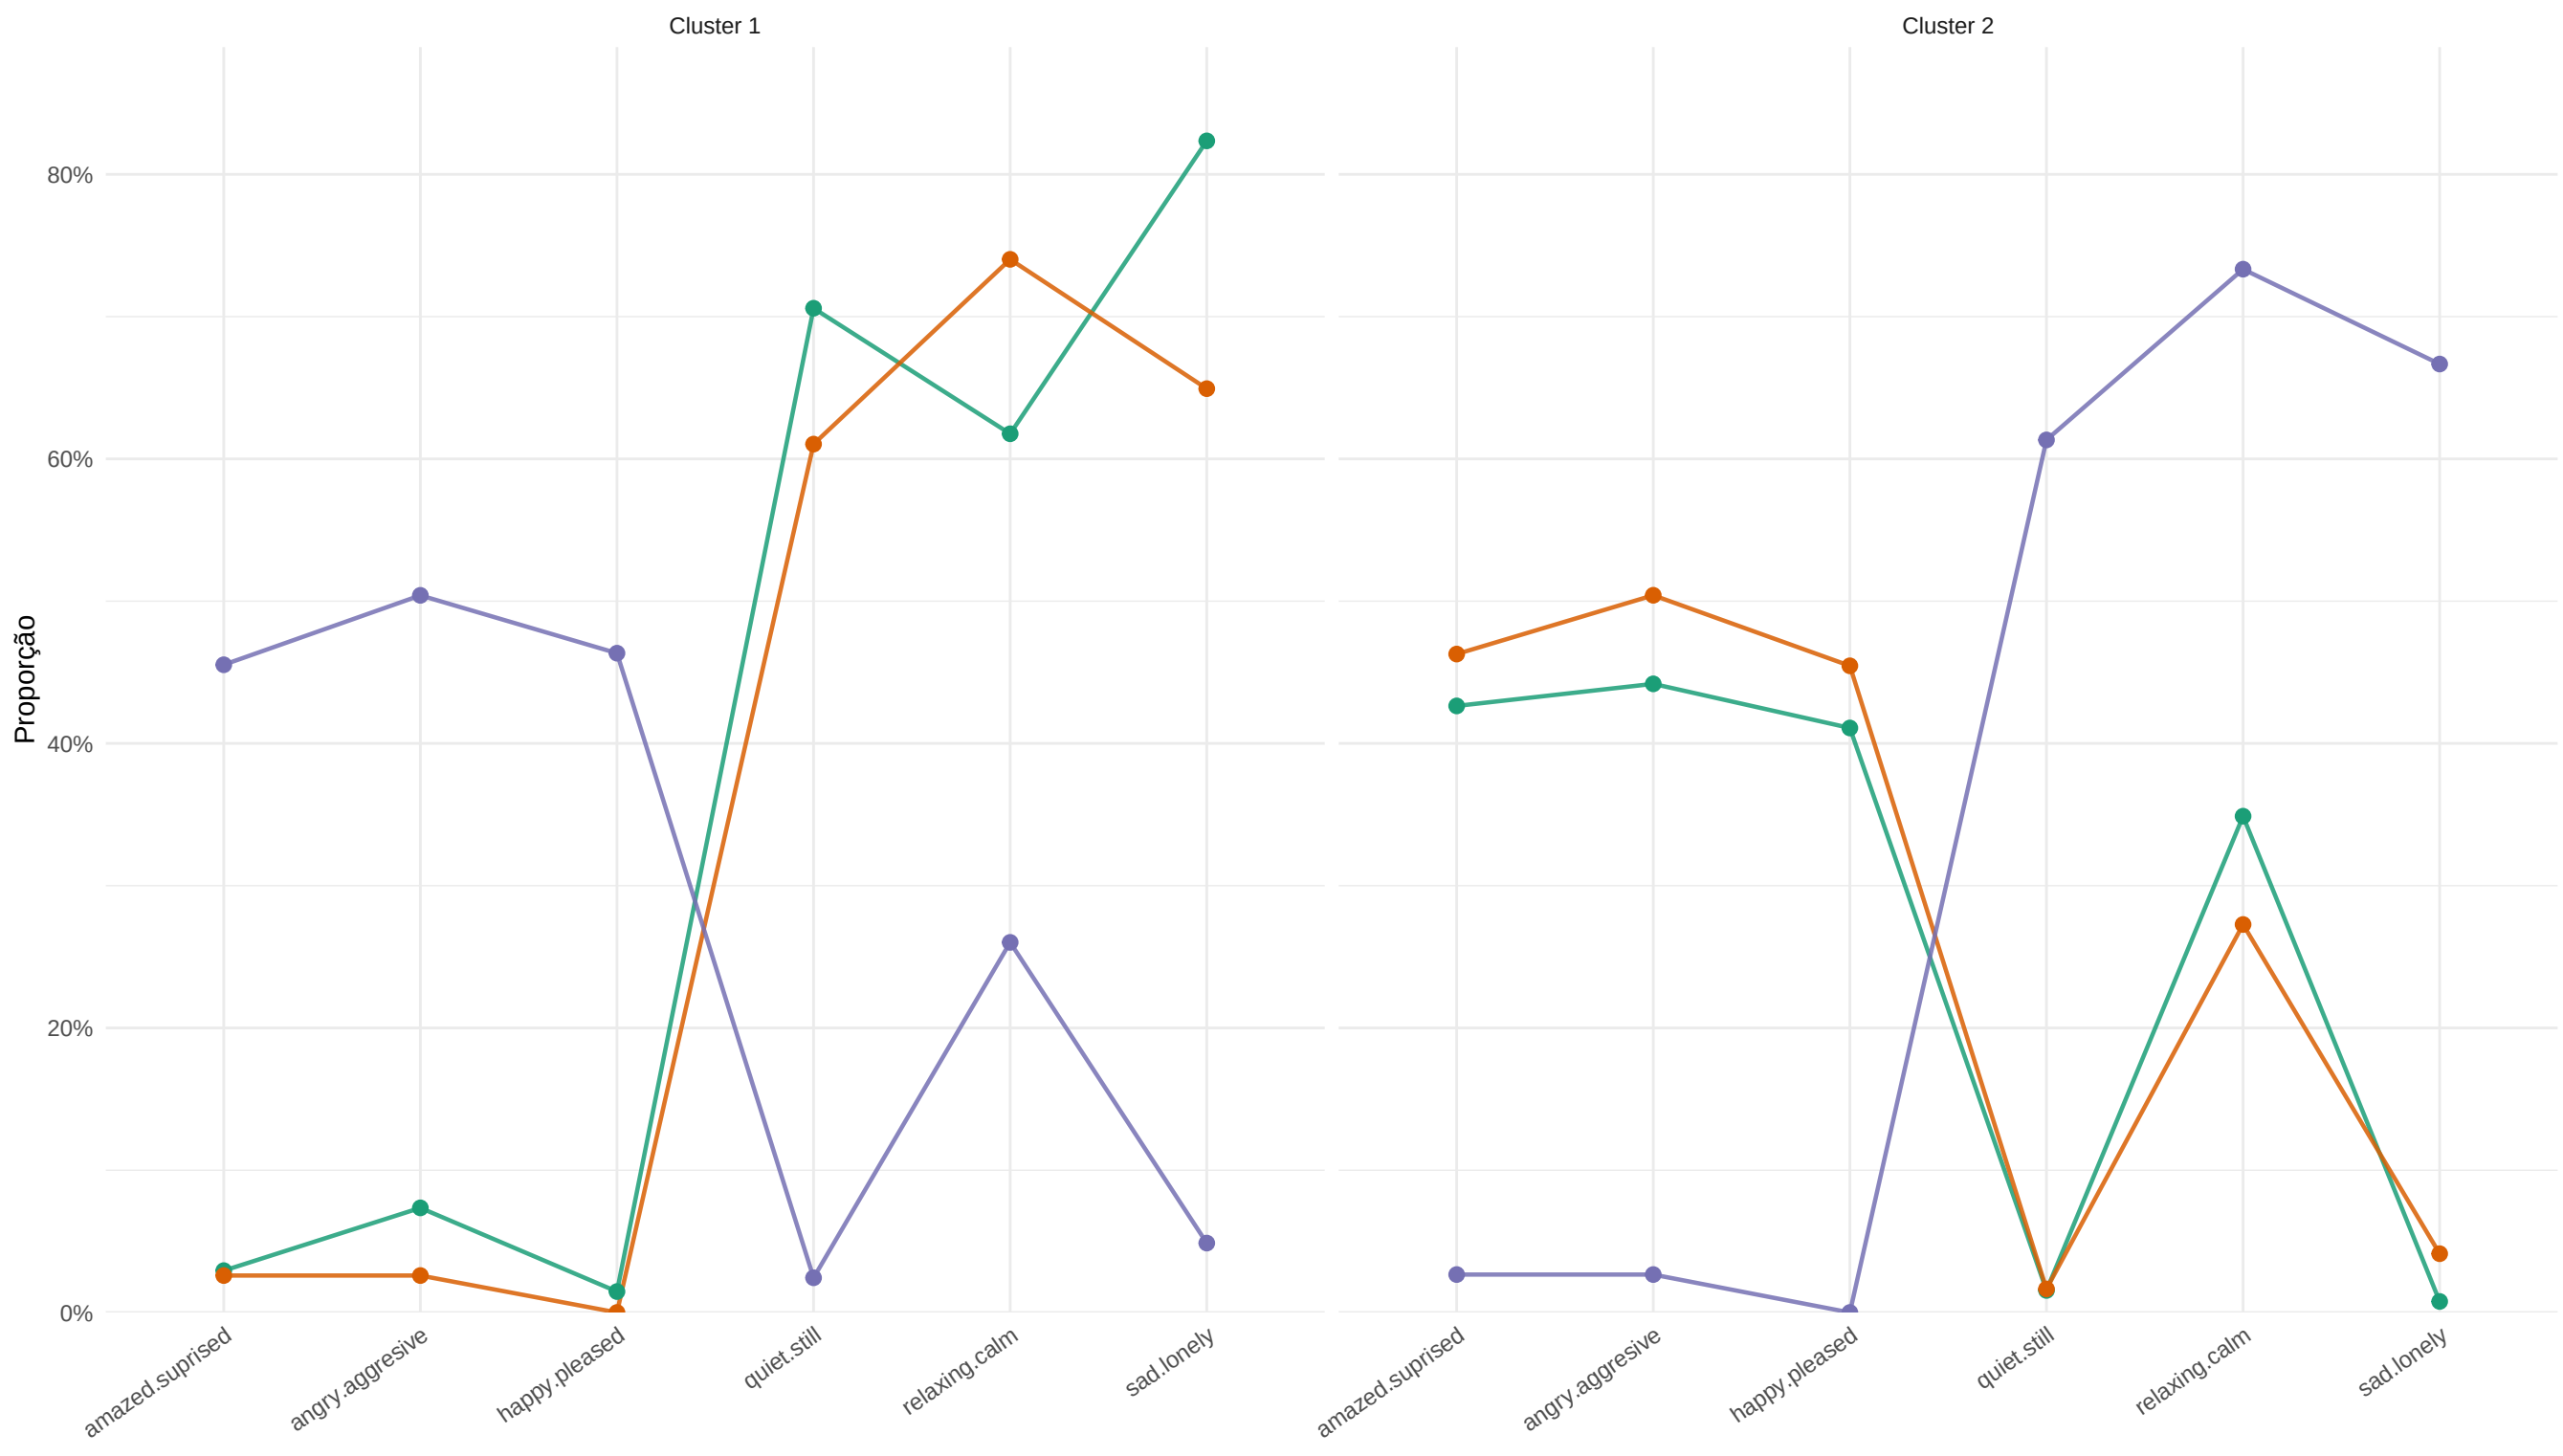

Células: proporção média (linha 1) ± DP entre folds (linha 2)

Estabilidade entre folds — emotions | bubble

Linhas sobrepostas = partição reproduzível · linhas dispersas = instabilidade

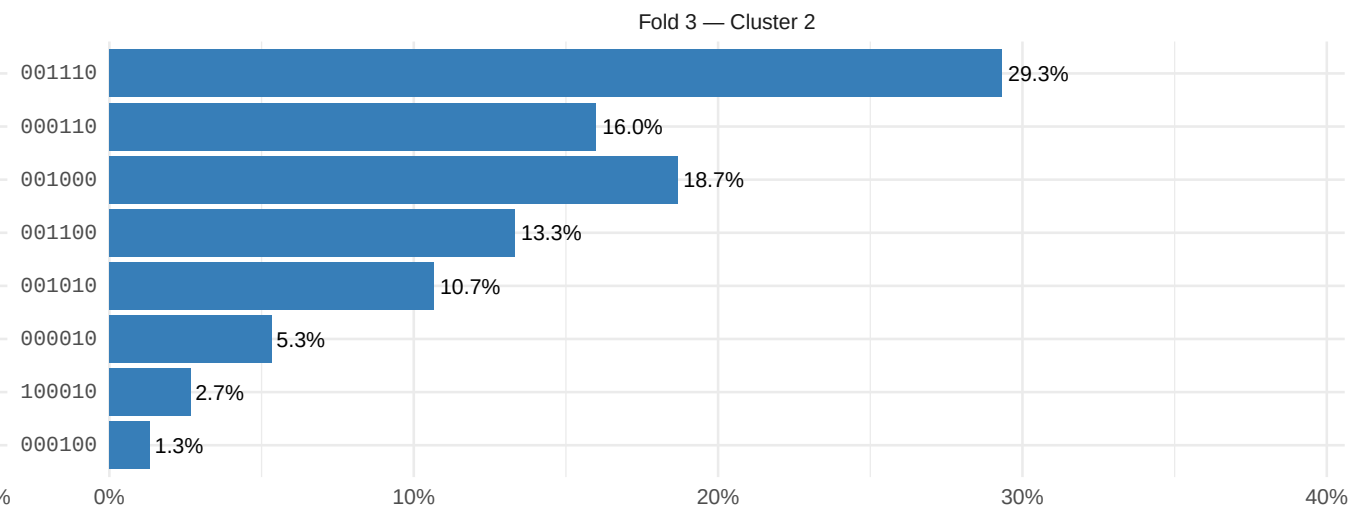

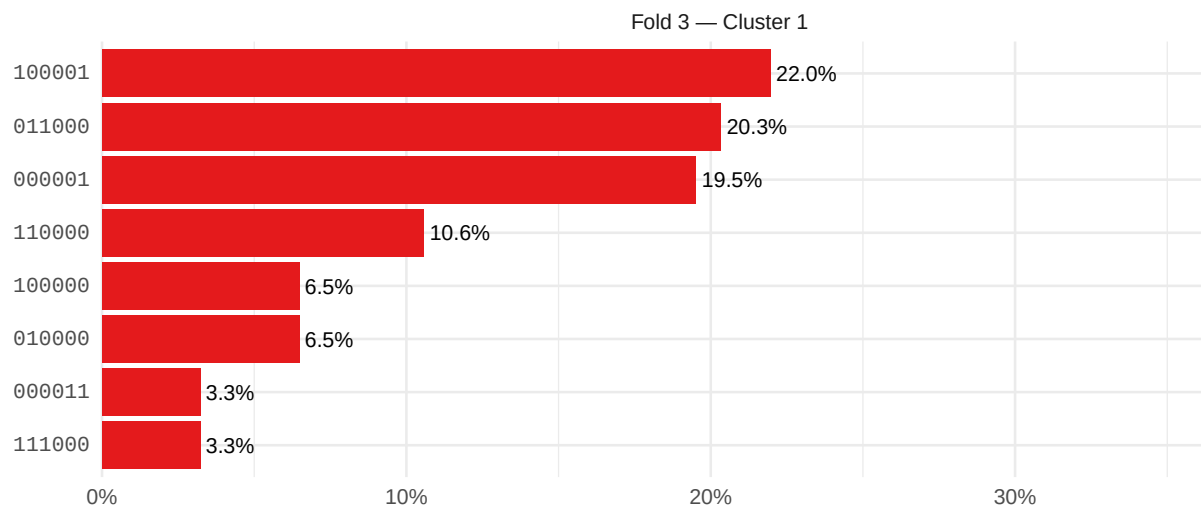

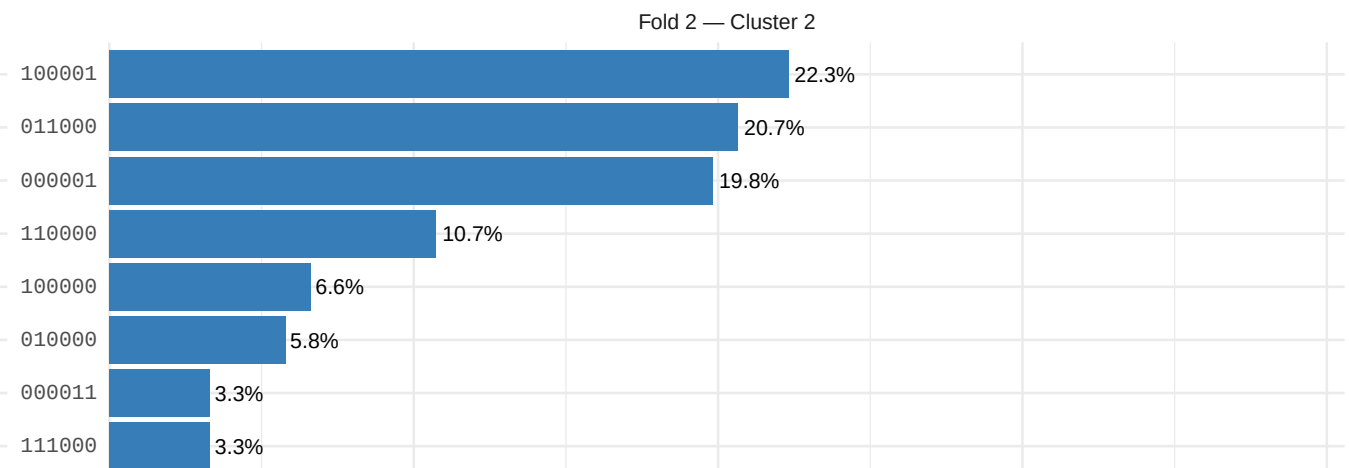

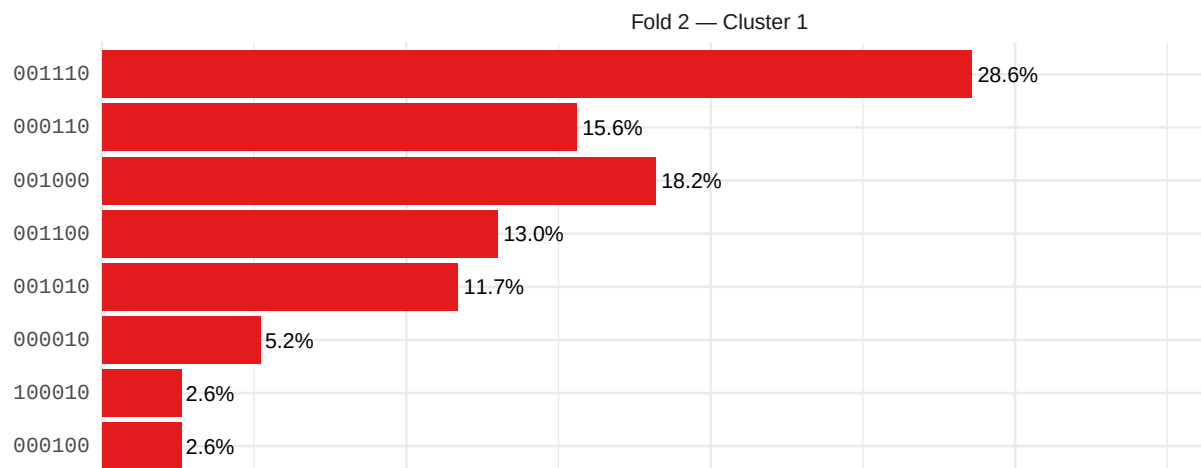

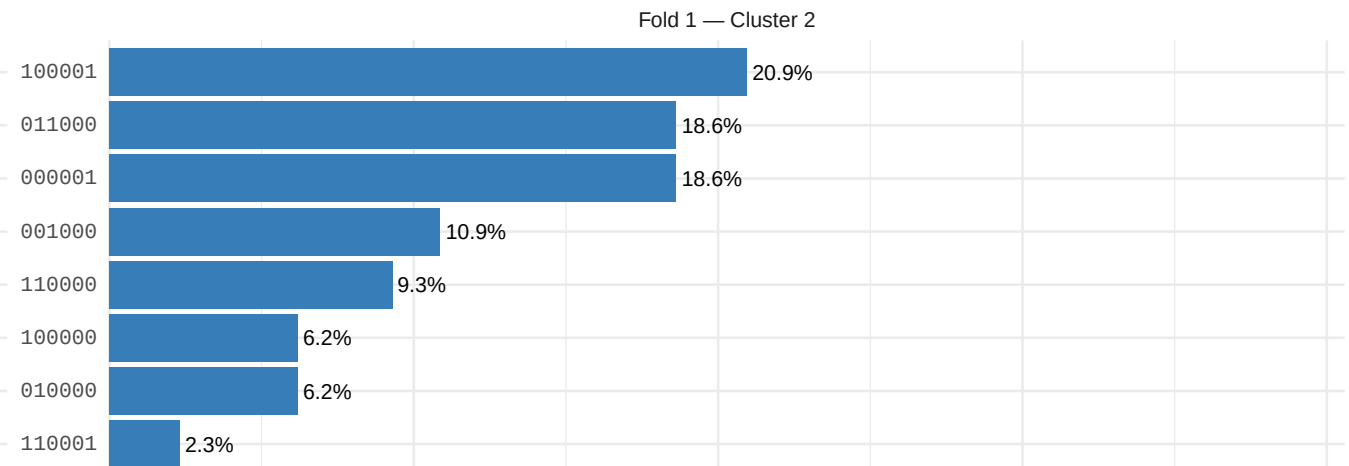

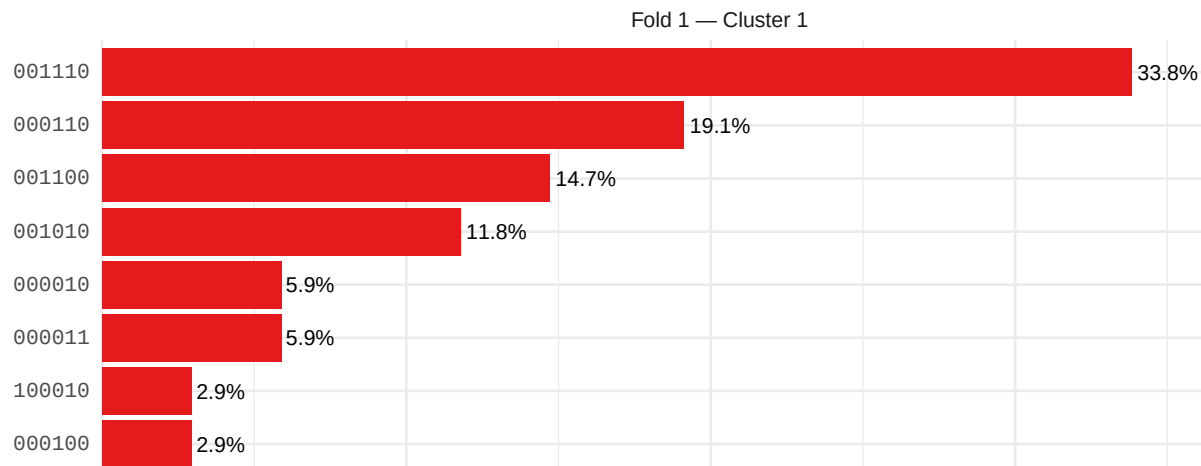

Fold 1 2 3

Top 8 labelsets por cluster — emotions | bubble

Eixo x = % das instâncias do cluster com aquele labelset

Cluster 1 2

Proporção no cluster

Dominância do labelset mais frequente — emotions | bubble

% das instâncias do cluster cobertas pelo labelset modal · rótulo indicado acima de cada barra

Cluster 1 2
