

Proporção média de rótulos por cluster — emotions | gaussian

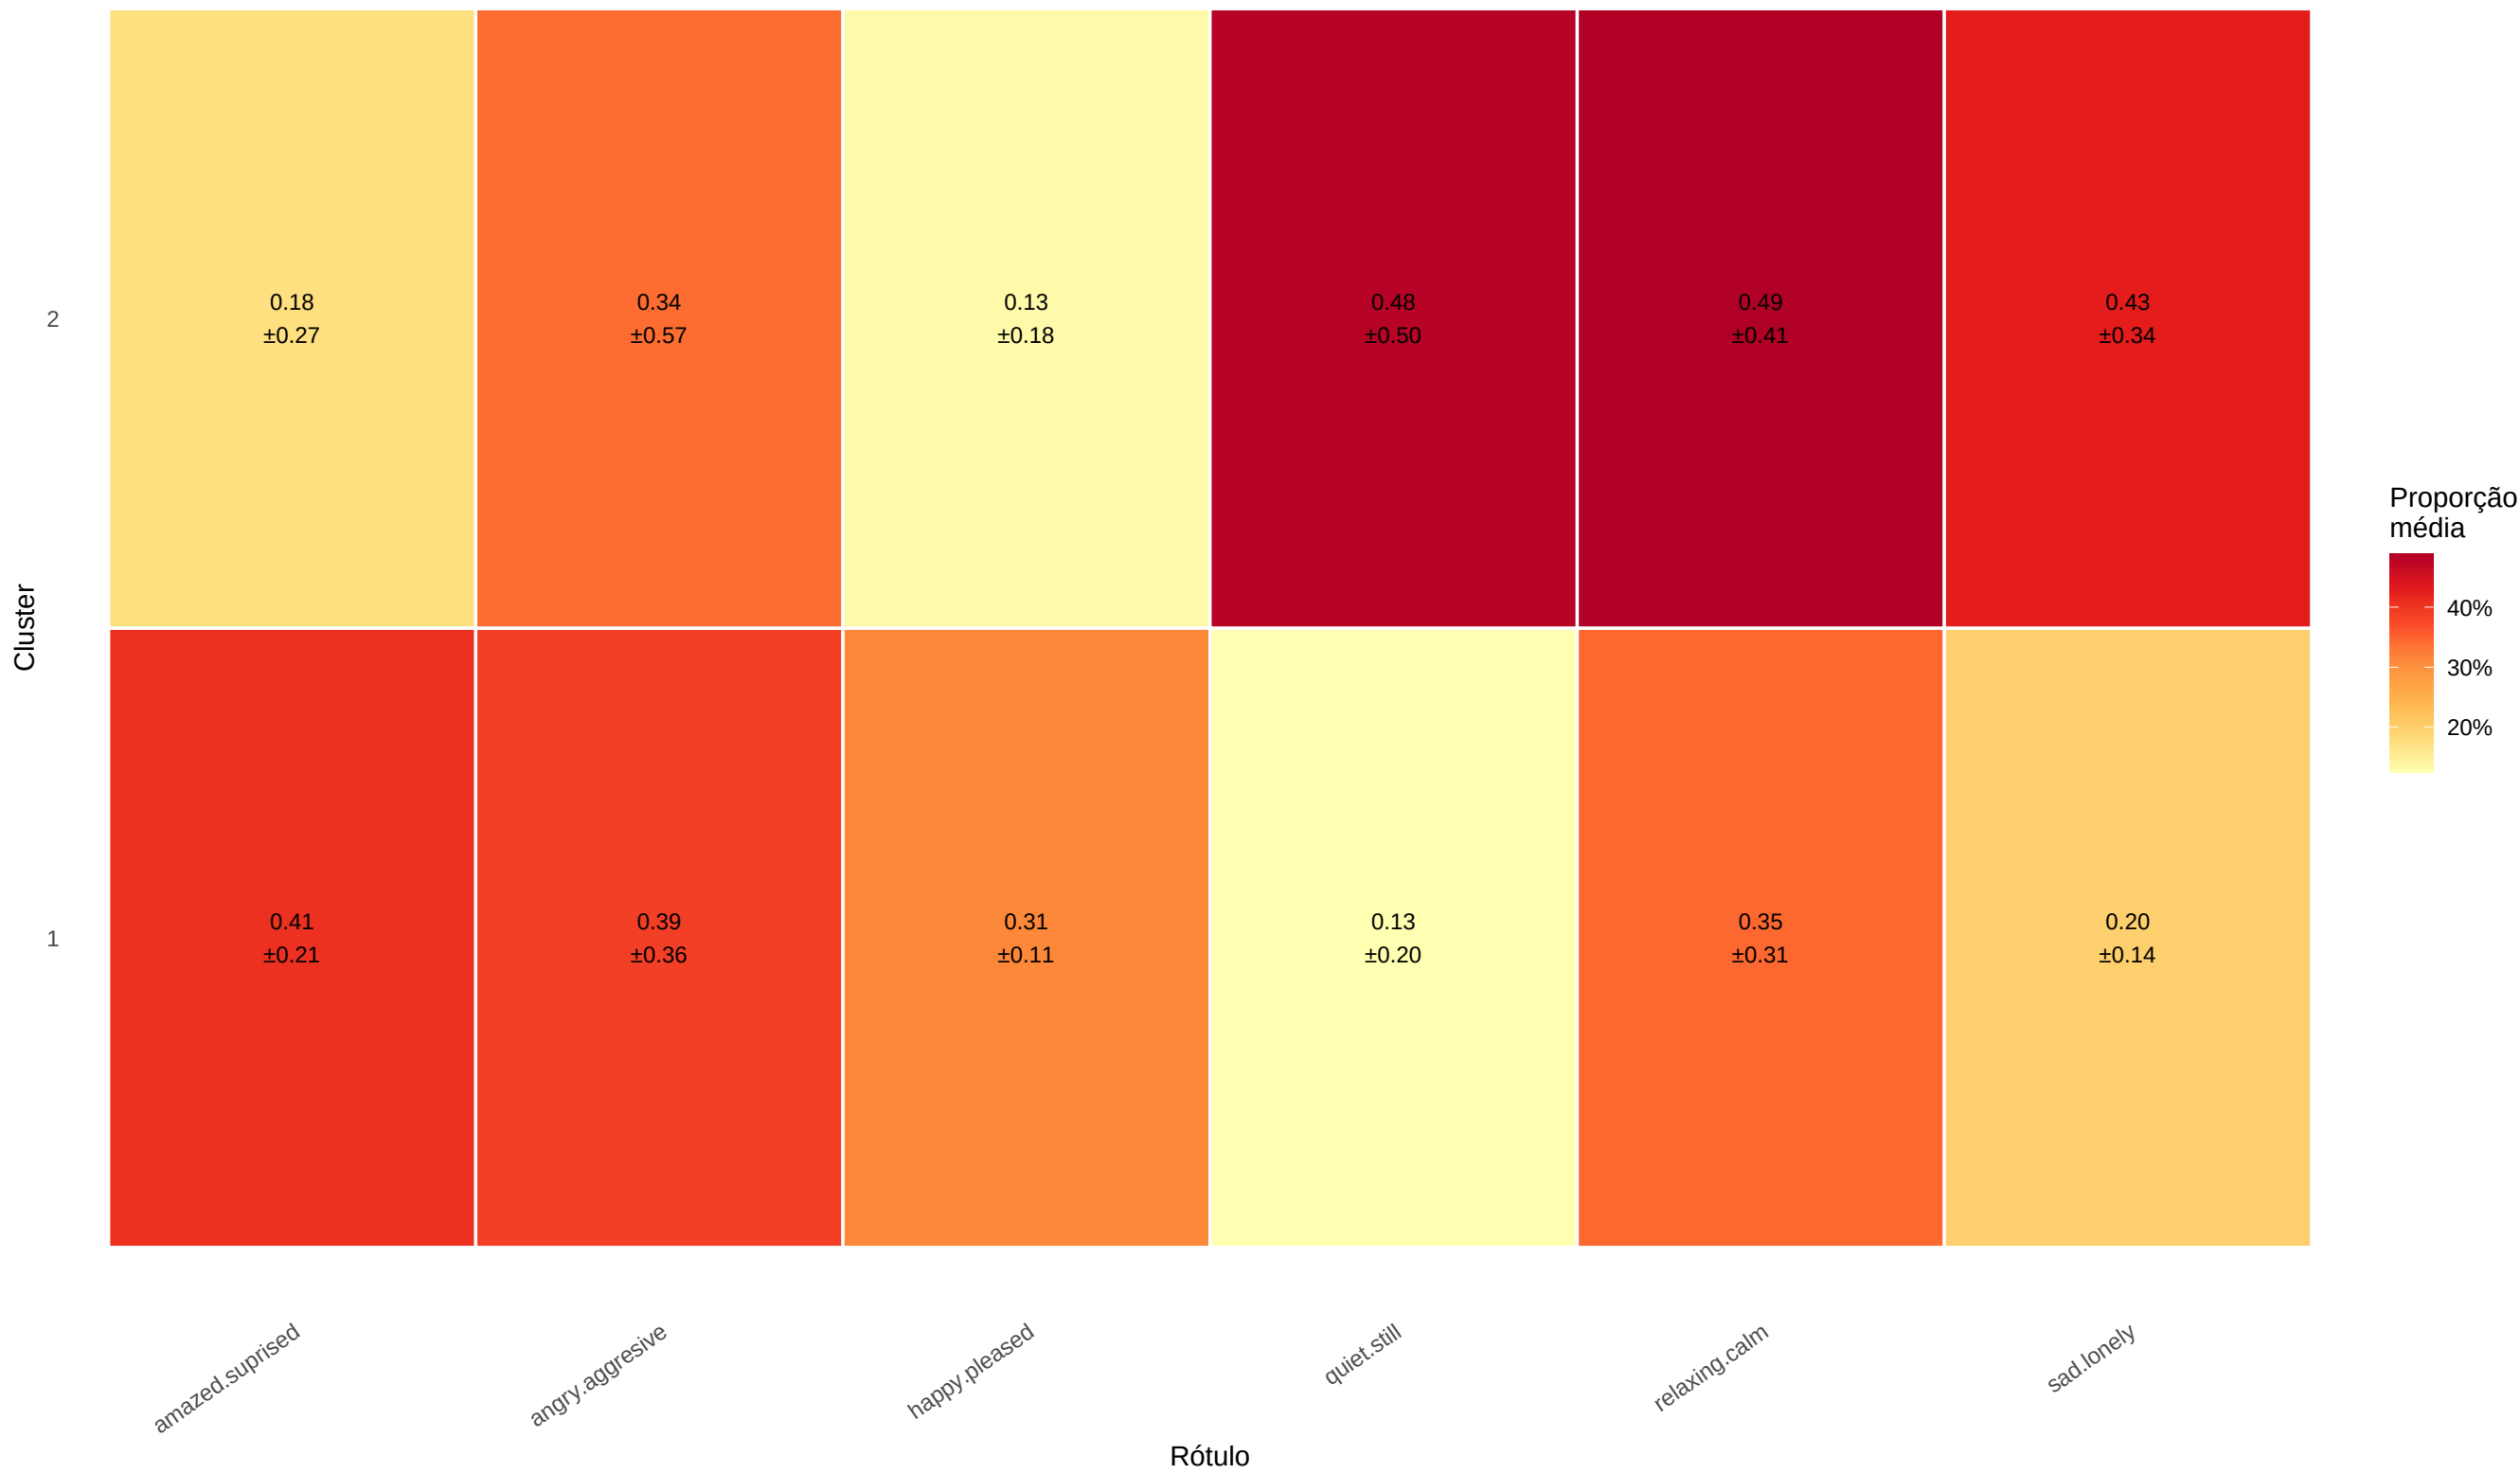

Barras de erro = ± 1 DP entre folds · quanto mais sobrepostas, mais instável a partição

Cluster 1 2

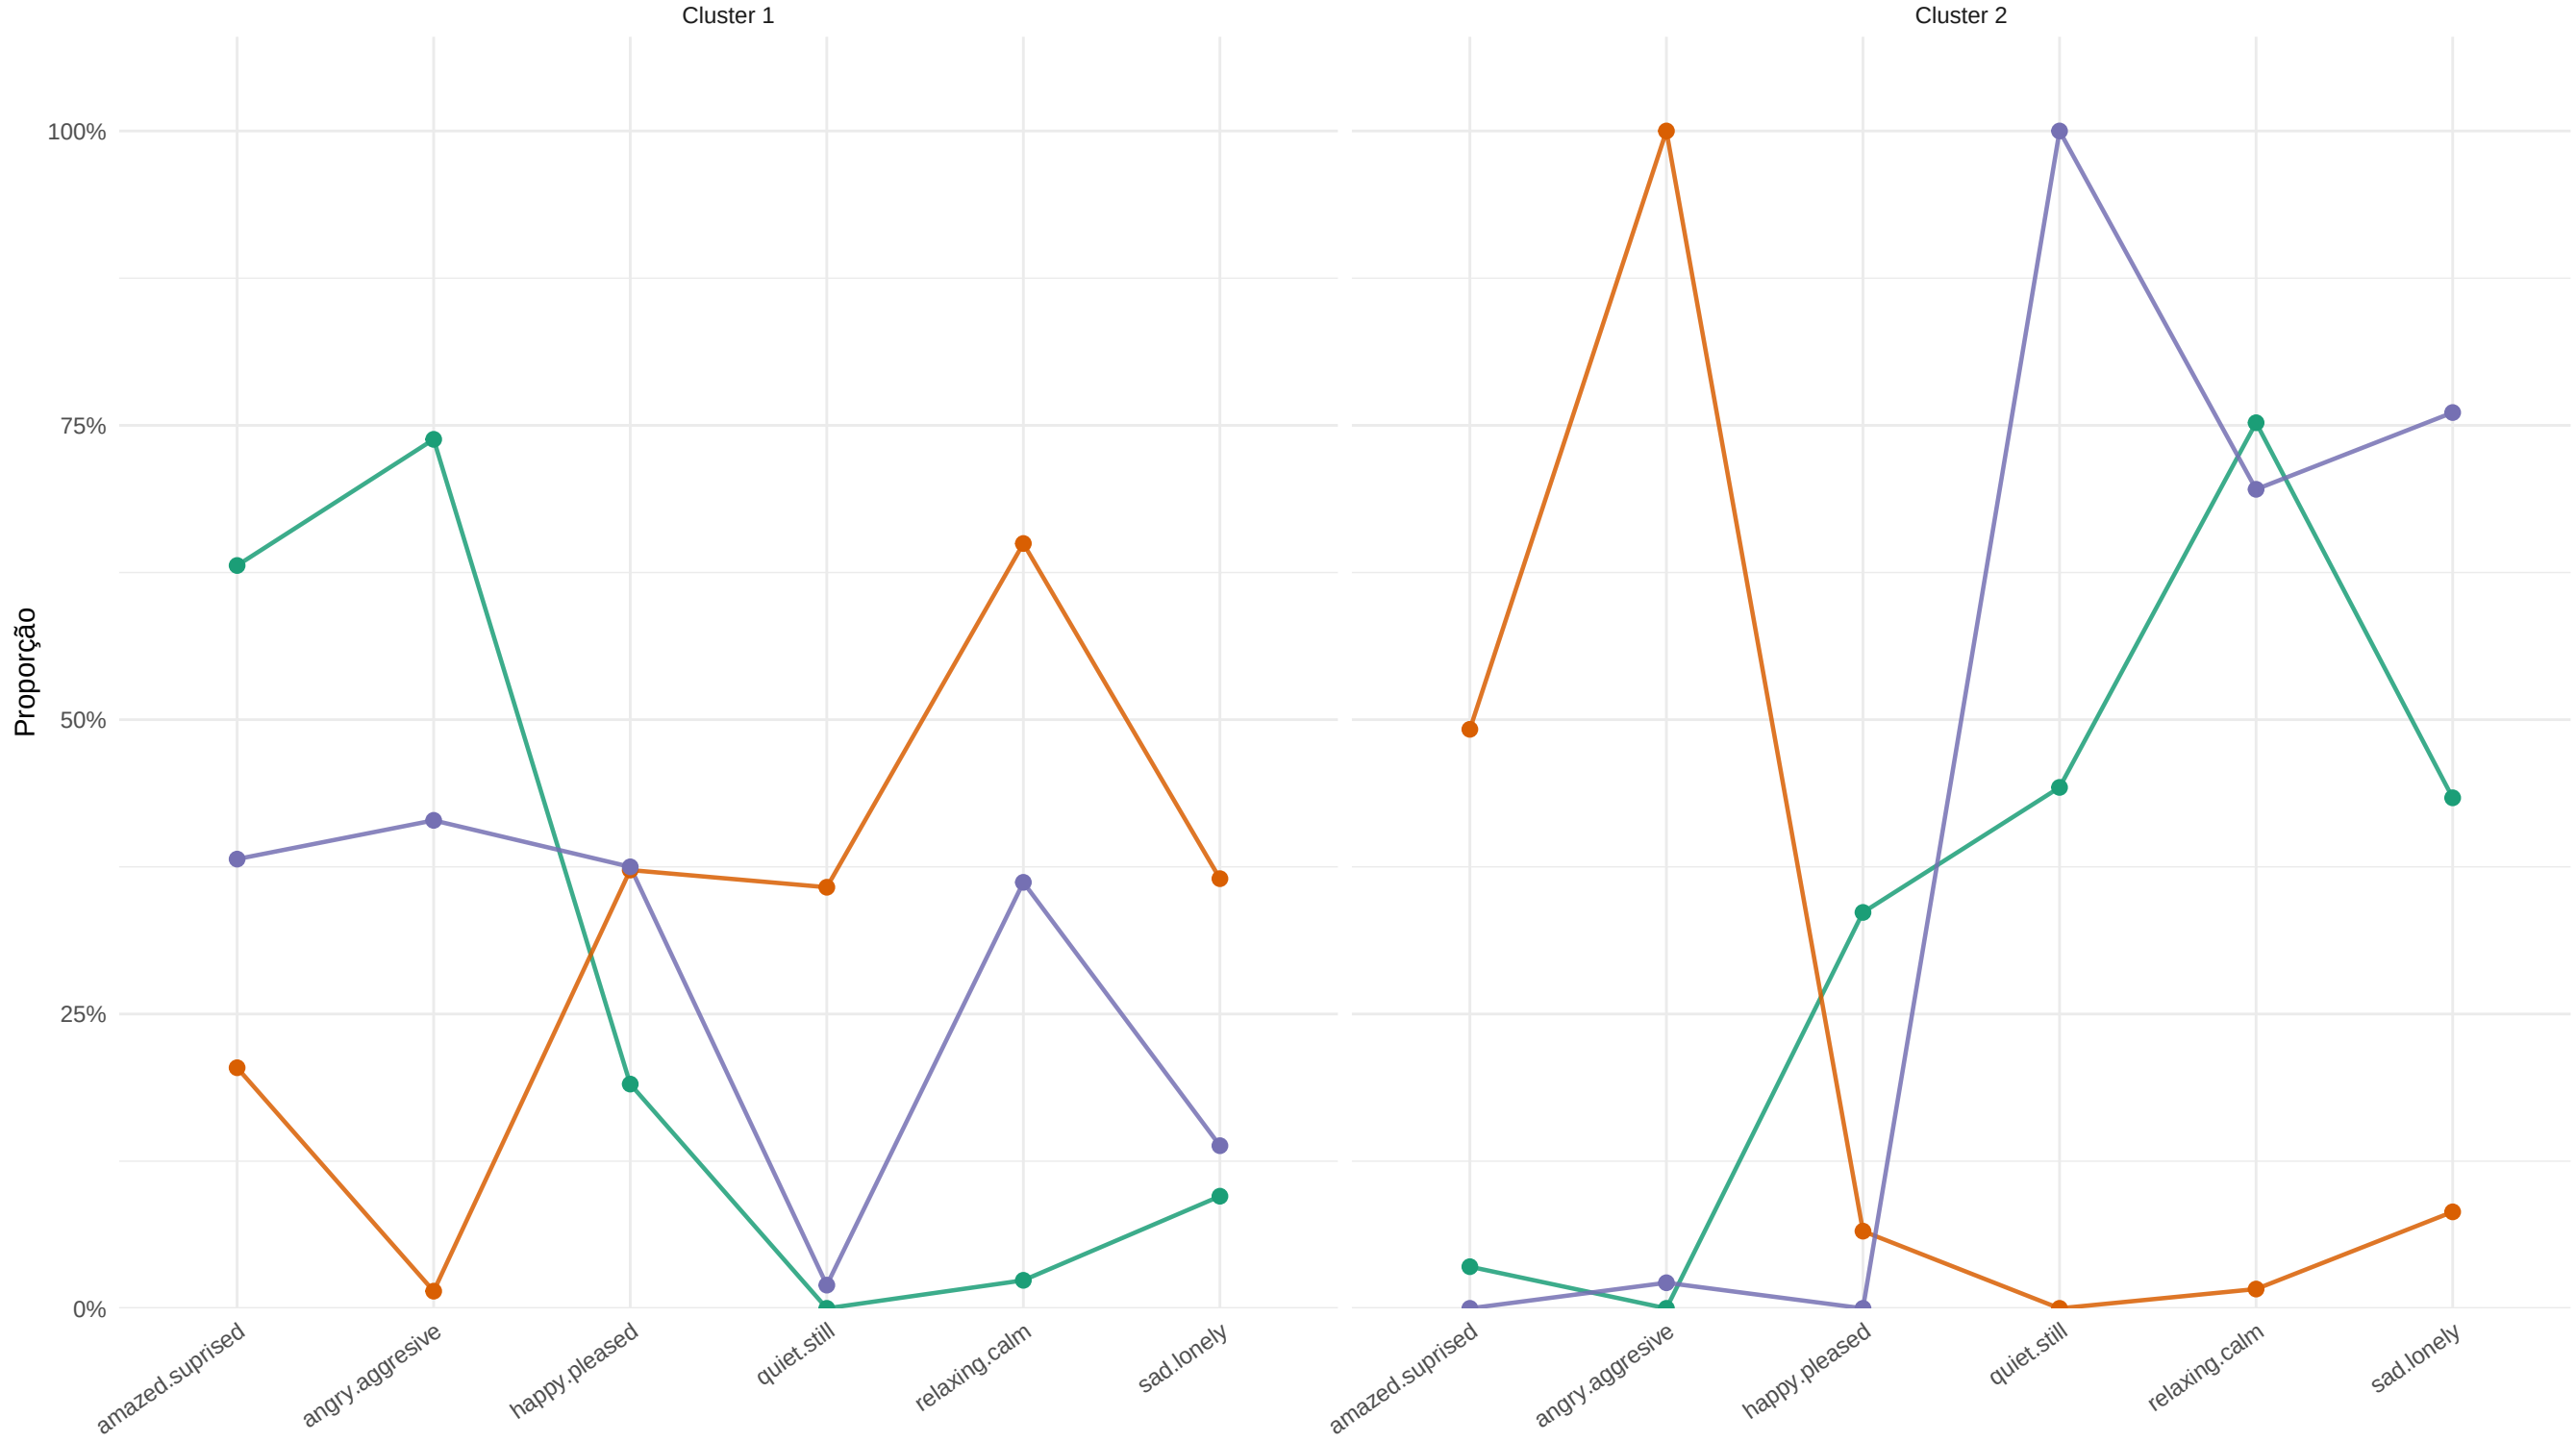

Heatmap de rótulos por cluster — emotions | gaussian

Células: proporção média (linha 1) ± DP entre folds (linha 2)

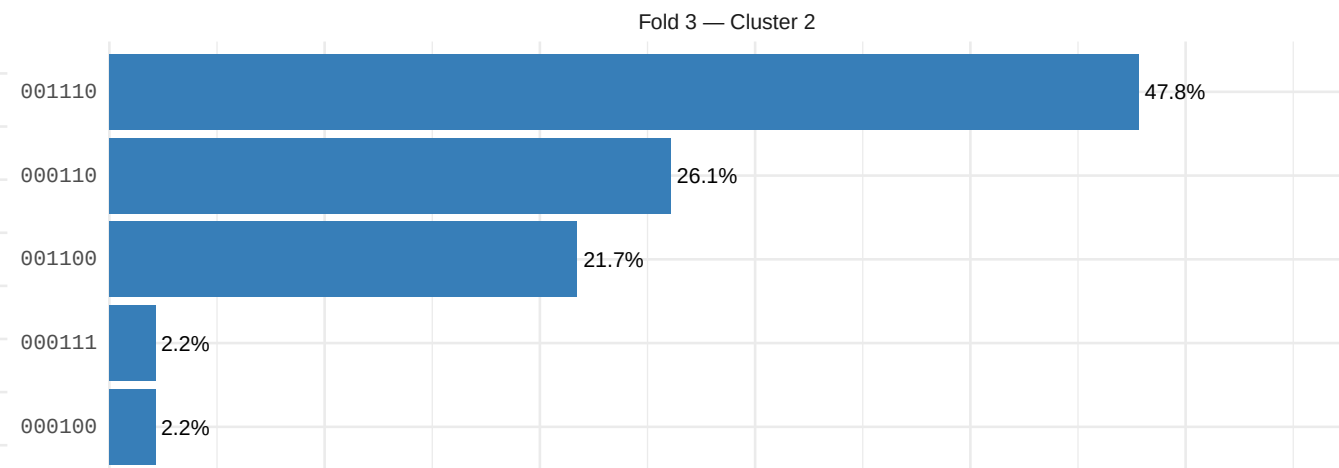

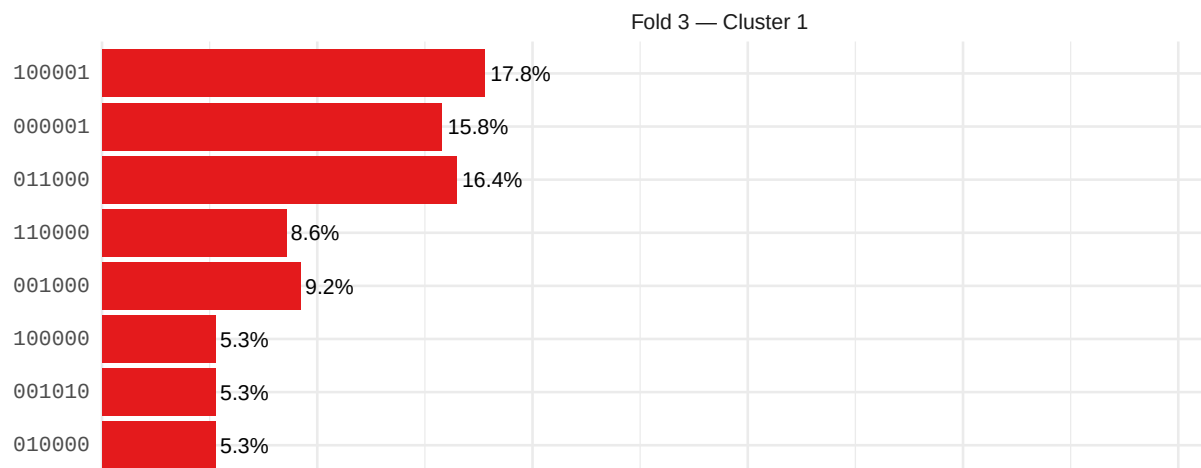

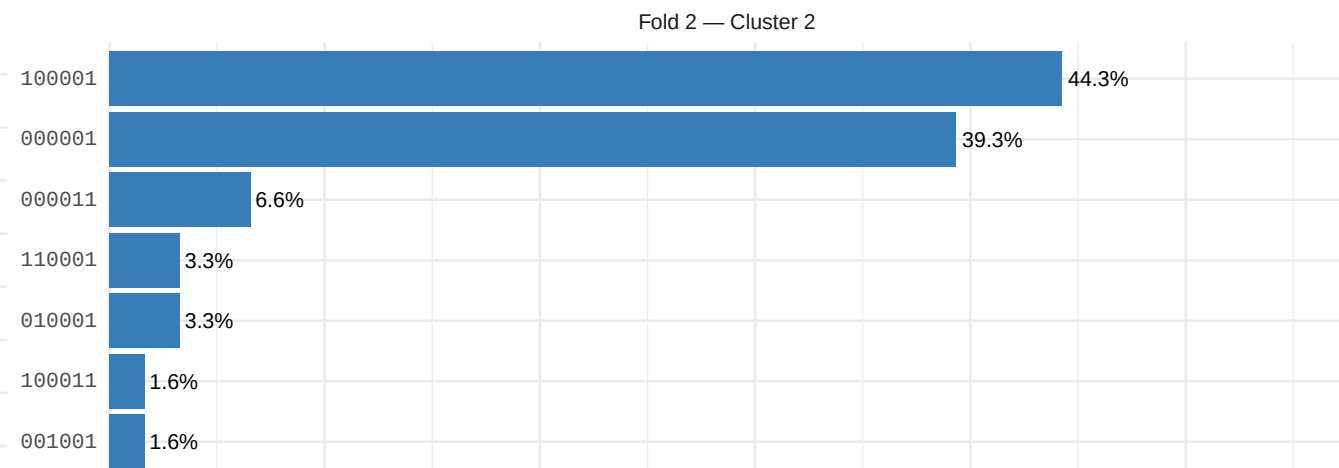

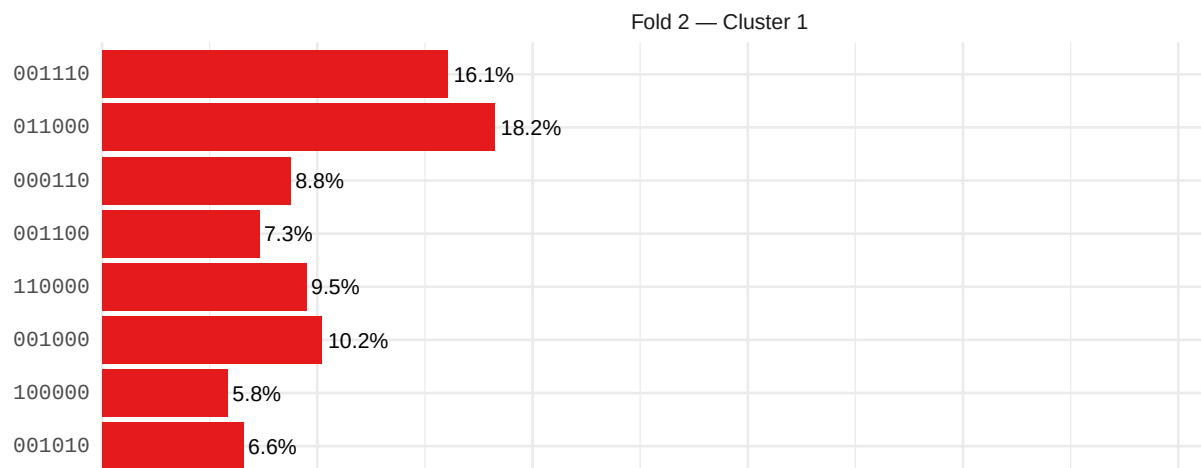

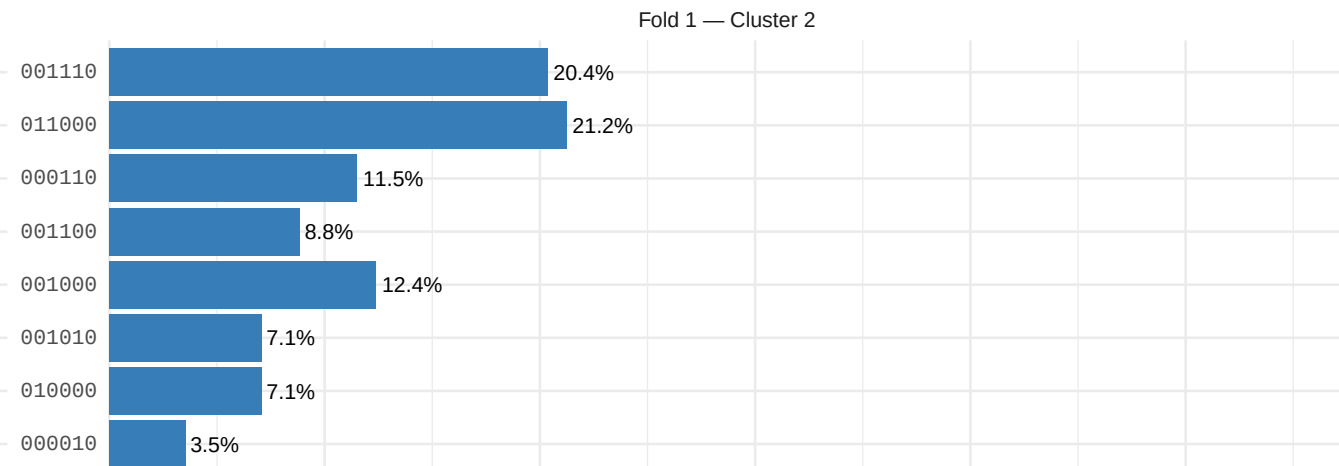

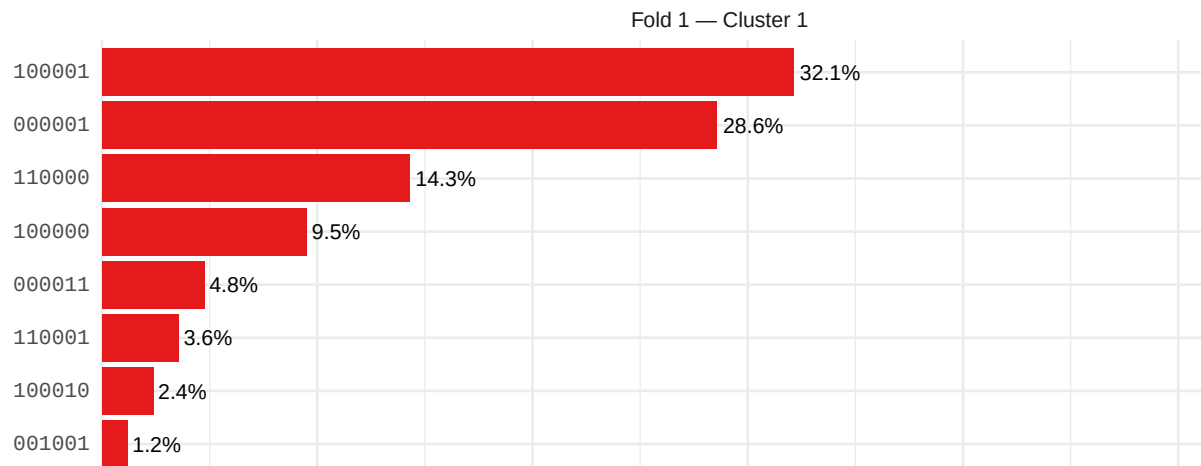

Fold 1 2 3

Top 8 labelsets por cluster — emotions | gaussian

Eixo x = % das instâncias do cluster com aquele labelset

Cluster 1 2

Proporção no cluster

Dominância do labelset mais frequente — emotions | gaussian

% das instâncias do cluster cobertas pelo labelset modal · rótulo indicado acima de cada barra

Cluster 1 2
